

Great Is Outlook For the Warren District in Copper

(Continued from Page One)

particularly strong position and it is likely to remain so for an indefinite time to come.

The returns of the business done day by day show strikingly the effect of the suspension of the exportation of copper on the general business of the market. Very rarely now do a day's sales reach a total amount of 1000 tons. Very often since the beginning of the year they have not exceeded the low totals of 350 tons. The totals have been down as low as 150 tons and on several days have been from 200 to 275 tons.

These would have seemed small quantities in times of peace and have seemed surprisingly small in a time of war like the present. One must fall back on averages for an explanation of these seemingly small quantities of copper sold on many days. On days between these "small" days the sales have reached much greater totals. From 650 to 750 tons as the total of a day's sales has been quite a common quantity, so that on taking an average, a very fair total is obtained. As a matter of fact the recent deliveries have been on a scale much in excess even of such averages.

The first half of March showed up remarkably well from the statistical point of view. The receipts amounted to 22,809 tons and the deliveries to 28,782, an excess of deliveries over receipts of 5973 tons. The visible stocks on March 15 stood at 28,402 tons, as compared with 34,375 tons on March 1, showing a decrease to the extent named. The total for Mexico and France was 17,554 tons, as compared with 21,552 tons on March 1.

In the first half of March, 1914, the deliveries amounted to only 25,314 tons and in the first half of March, 1915, to 24,375 tons. The receipts again in the first half of March, 1914, amounted to only 20,716 tons, and in the first half of March, 1915, to 25,345 tons. On these comparisons March, 1915, is seen to have done remarkably well, as well, indeed, that it has given fresh impetus to the market and put the larger handlers of the metal in good mood. The market, indeed, seems to have gotten well away from its worst and to have left the elements of depression far behind.

Some interesting computations of the wastage of copper by Germany through the war have been made. One of the more trustworthy has brought the quantity out at an average of 300 tons a day and has placed the consumption by the Allies at about an equal quantity. Assuming that the British government is using one-third of this total, a consumption at the rate of about 35,000 tons of copper per annum by this government alone becomes visible.

Germany's total, on war account, was estimated roughly as being at the rate of 110,000 tons per year. If the Allies' consumption, together, be taken at a similar amount, as estimated, one obtains a total which readily explains the interest which has attached to the metal in the United Kingdom and the more active business which has lately been done in it on the London market.

VILLA IS CONFIDENT

EL PASO, April 17.—When informed of Obregon's report of victory, Villa telegraphed the following: "The Carranza people can get up news as they wish, relate how they captured a hundred cannon and many other things, but the time will come when all will be unmistakable."

Other telegrams explain the abandonment of the attack stated to be due to shortage of ammunition.

"It is true I have not taken the city of Culiacan, but I can state that, if we have had losses, they losses are heavier and their condition is worse than ours. I hope to strike a decisive blow."

All salaried employees of Du Pont Powder Co. have been granted a bonus of 20% of salary for a year. About 1500 persons were affected. Company recently granted a 20% increase in wages to its 15,000 payroll workmen at plant throughout the country.

Who Can Doubt Sworn Testimony of Honest Citizens?

Some time ago I began the use of your Swamp-Root with the most remarkable results. For years I was almost a wreck and was a great sufferer. I was so bad at times I would faint away and had vertigo spells. Finally a new doctor was called in and he said that I had kidney trouble and gave me medicine of which I took several bottles. I obtained some relief from this but I was getting weaker all the time. I could not sleep and suffered so much pain that my husband and children had to lift me in and out of bed. After this time two friends sent me word to try Swamp-Root, which I did, and I am glad to state that the first dose gave me great relief. After taking the third dose I was helped into bed and slept all the night.

I took several bottles of Swamp-Root and I feel that I owe my life to this wonderful remedy. The two family doctors said that I could not live three months. I would have to be helped in and out of bed ten to twenty times every night. After taking Dr. Kilmer's Swamp-Root for two days I was entirely free from getting up and could sleep soundly.

MRS. D. E. HILMAN,
Tunneton, W. Va.
Personally appeared before me, this 11th day of September, 1909, Mrs. D. E. Hilman, who subscribed the above statement and made oath that the same is true in substance and in fact.

JOSEPH A. MILLER,
Notary Public.

Letter to Dr. Kilmer & Co., Binghamton, N. Y.

Prove What Swamp-Root Will Do For You
Send ten cents to Dr. Kilmer & Co., Binghamton, N. Y., for a sample size bottle. It will convince anyone. You will also receive a booklet of valuable information, telling about the kidneys and bladder. When writing, be sure and mention the Bisbee Daily Review. Regular fifty-cent and one dollar size bottles for sale at all drug stores.

IN STERLING LIVES A GIRL

Who Suffered As Many Girls Do—Tells How She Found Relief.

Sterling, Conn.—"I am a girl of 23 years and I used to faint away every month and was very weak. I was also bothered a lot with female weakness. I read your little book 'Wisdom for Women,' and I saw how others had been helped by Lydia E. Pinkham's Vegetable Compound, and decided to try it, and it has made me feel like a new girl and I am now relieved of all these troubles. I hope all young girls will get relief as I have. I never felt better in my life."—Mrs. JOSEPH TETREAU, Box 116, Sterling, Conn.

Massena, N. Y.—"I have taken Lydia E. Pinkham's Vegetable Compound and I highly recommend it. If anyone wants to write to me I will gladly tell her about my case. I was certainly in a bad condition as my blood was all turning to water. I had pimples on my face and a bad color, and for five years I had been troubled with suppression. The doctors called it 'Anemia and Exhaustion,' and said I was all run down, but Lydia E. Pinkham's Vegetable Compound brought me out all right."—Miss LAVINA MYERS, Box 74, Massena, N. Y.

Young Girls, Heed This Advice.

Girls who are troubled with painful or irregular periods, backache, headache, dragging-down sensations, fainting spells or indigestion, should immediately seek restoration to health by taking Lydia E. Pinkham's Vegetable Compound.

BELGIAN CONGO IS PIONEER COUNTRY RICH IN PROMISE

This Colonial Empire Sought By Germany Is Carved Out of the Heart of Lands in Equatorial Africa.

WASHINGTON, April 17.—Describing the Belgian Congo, which is now prominent in the discussion of settlements to be made at the conclusion of the war, the National Geographic Society, in a statement issued today, says:

"Although Belgium now controls less than 400 square miles of territory at home, she is still possessed of a colony one-fourth as large as all Europe together. It is larger than the combined areas of all the countries now at war, outside of Russia. That colony is the Belgian Congo, with nearly a million square miles of territory.

"This empire is carved out of the heart of equatorial Africa, and includes within its confines one of the world's greatest rivers, the Congo, from which the colony takes its name.

The river has a course of about 3,000 miles, and with its tributaries, offers a wonderful system of communication for opening up the rich hinterland. It is estimated that there are 6,000 miles of navigable waters in the colony, while the Congo river is navigable for ocean steamers for 100 miles up stream. Here follows a section of 200 miles of rapids, above which the river is navigable for 1200 miles.

"The work of exploiting the heart of Africa has just begun. There has been considerable difficulty in inducing European colonists to emigrate to these regions and begin new homes. First, the Congo has the evil reputation of being no fit country for the white man, and, secondly, a feeling has existed that a permanent home there meant permanent burial without the pale of civilization. Therefore, the promoters of the Congo have had to overcome a great unwillingness among their people to exchange the comforts and certainties of the north for the questionable advantages of pioneering in the wild, 'dark' country, which has successfully defied all progress for ten thousand years.

"Some advance, however, has been made, and the future of the Congo seems to be one of promise. Although the climate is generally hot and moist it is supportable by the white man. The climate of the coast lands is least unfavorable for the Europeans. Over a great part of this territory, normal temperatures range between 60 and 80 degrees. Rain is everywhere abundant. The extreme heat of the day is generally relieved by sharp evening chills.

"The white population of this land remains still negligible. The total population has been estimated at 15,000,000, in which are counted a mere 9000 whites. The native population, while overwhelmingly superior in numbers, has been aided by the white man's machine guns, railways, steamboats and telegraph, and forms a definite working body for the improvement of the land. More than 1500 miles of railway are in operation and in course of construction. Further, 1145 miles of telegraph communication have been established, five wireless stations, and some 50 postoffices. Before the war, there was regular

communication with Antwerp, a steam or from that port calling every fortnight.

"The agricultural possibilities of the Congo are great. If modern methods of sanitation finally open it up to the white man, its flora is very rich and varied. Among the products now cultivated in its fields are coffee, cotton, yams, papayas, pineapples, cassava, corn, rice, peanuts, beans, bananas, tobacco, sorghum and kaffir corn. Its forests abound in rubber vines, and the natives are employed for gathering the rubber, which forms the chief article of the colony's export. Rich cabinet woods are plentiful, and many import gums and resins are collected. All of the domestic animals thrive in this African country. The list of native animals includes the elephant, hippopotamus, buffalo, antelope, chimpanzee, rhinoceros, and crocodile. Slaughter of elephants for their ivory has been prohibited, though the ivory exports are still heavy, coming chiefly from native accumulations. The minerals, large deposits of iron, tin and coal occur, and some rich deposits of copper and gold are found in the southeast.

"Palm kernel oil, white coconut, coffee, corn, kola nuts, gold, ivory, copper and rubies are the articles of export. The total trade of the Congo is about \$28,000,000. It is about evenly divided into exports and imports. For many years, this territory, as the Congo Free State, first recognized by the United States in 1884, maintained a quasi-independence under the rule of Leopold of Belgium. It was formally annexed to Belgium in 1910. It has an annual revenue of about \$2,000,000, and a public debt of more than \$30,000,000. The colony is defended by about 18,000 native troops."

RUMORS PERSIST OF DISSOLUTION OF BIG AMALGAMATED COMPLY

Though Rumors Have Been Around For Some Time That Such Action Was Contemplated, It Is Unsettled

It is reported in New York that the dissolution of the Amalgamated Copper company is contemplated. There have been rumors in circulation for some time that his move has been planned, and many of the transfers recently made by that company to the Amalgamated Copper company have given leads for a widespread belief that the rumors are true. By transferring all of its holdings to the Amalgamated company, the Amalgamated would cease to exist, and the Amalgamated would be both an operating and holding company, whereas now the Amalgamated is the holding company, and the Amalgamated the operating company.

It was in 1910 that the Amalgamated began transferring its holdings to the Amalgamated company in exchange for the latter's stock. In April of that

All Blood Disorders Quickly Driven Away

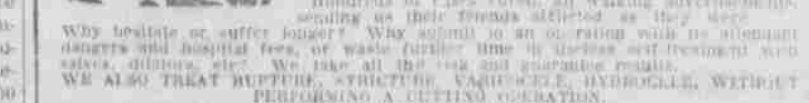

Astonishing Results With the Greatest Blood Purifier Ever Discovered.

Strength, Power, Accomplishment are all typified in S. S. S. Some blood disorders become deadly rooted in the glands and tissues, and the danger is made of poisoning in drastic drugs. These only aggravate, by causing other and worse troubles. A host of people know this to be true. They know from painful experience. To get right down into where the blood is vitiated requires S. S. S., the greatest blood purifier ever discovered. This remarkable remedy contains one hundred times the active principle of which is to stimulate the tissues to the healthy selection of its own essential nutriment and the medicinal elements of this matchless blood purifier are just as essential to well balanced health as the nutritious elements of the meats, grains, fats and sugars of our daily food. Not only this, but if from the presence of some disturbing poison there is a local or general interference of nutrition to cause boils, carbuncles, abscesses and kindred troubles, S. S. S. so directs the local cells that this poison is rejected and eliminated from their presence. Then, too, S. S. S. has such specific stimulation on these local cells as to preserve their mutual welfare and a proper relative assistance to each other. In a very brief time S. S. S. has the reconstructive process so under control that remarkable changes are observed. All enervate, plethoric, strabismic, pale and sallow have disappeared, and from head to foot there is a conscious expansion of ripened health. From the fact that S. S. S. is purely a natural preparation, it is accepted by the weakest stomach and has great tonic influence. Not one drop of drugs or minerals is used in its preparation. Ask for S. S. S. and insist upon having it. And if you desire faithful advice upon any matter concerning the blood and skin write to The S. S. S. Co., 230 Swift Mid, Atlantic, Ga. Do not allow some sordid clerk to mislead the atmosphere in disguise over something "just as good" as S. S. S. Beware of all counterfeits.

WE INVITE THE STRICTEST INVESTIGATION

Rheumatism
Just put a few drops of Sloan's on the painful spot and the pain stops. It is really wonderful how quickly Sloan's acts. No need to rub it in—hold on tightly it penetrates to the bone and brings relief at once. Kills rheumatic pain instantly.

Mr. James E. Alexander, of North Platte, Neb., writes: "Many years ago I was laid up with rheumatism in the right knee. I had it so bad that I could not get out of bed. I had to jump on my feet to get relief. I had used every remedy I could find, but nothing helped. I then tried Sloan's Liniment. I put it on my knee and in ten minutes it was perfectly easy. I think it is the best of all liniments I have ever used."

year the Amalgamated received \$60,416,450 par of Anaconda stock for \$37,367,495 par of shares of the Boston & Montana Consolidated Copper & Silver Mining Co., Boston and Boston Consolidated Mining Co., Parrot Silver & Copper Co., Trenton Mining & Development Co., Washoe Copper company, Big Blackfoot Lumber company and Diamond Coke & Coal Co.

In the following year Amalgamated transferred to the other company properties of the Oriental Consolidated Mining company, the Clark-Montana Realty company and the Colma-Parrot Mining & Smelting Co., resulting in exchange \$2,812,500 par of Anaconda stock. Recently the Amalgamated has taken over the United Verde Smelting company. The Amalgamated owns \$79,609,150 par of Anaconda stock in addition to controlling \$1,575,870 par of the United Verde Smelting company, which will, in the near future, be transferred to the Amalgamated.

Government has begun investigation into theoretical looking agencies in New York in search of possible violations of Sherman antitrust law.
